

Other certification schemes recognized by REDcert

REDcert recognizes evidence from all voluntary certification schemes that have been recognized by the EU Commission under Article 30 (4) of Directive (EU) 2018/2001 ("REDII") for the respective scopes. The same applies to national schemes recognized under Article 30 (6) of REDII.

Evidence from other schemes for which there is no EU recognition, cannot be recognized.

An overview of the recognized voluntary or national schemes is published on the [website of the EU Commission](#).

Economic operators wishing to supply sustainable biofuels, bioliquids and biomass fuels with verification from another scheme to a participant in the REDcert scheme or to use them themselves as a REDcert-certified company are requested to regularly check the current recognition status of the other schemes on the EU Commission's website.
