Core data	
1	Application for access for a operation <input type="checkbox"/> operating unit <input type="checkbox"/>
2	Name, legal form
	Legally responsible body or individual
	Street/street number
	Postal code, place
	Country
	E-mail address
	Telephone number

**The applicant follows the guidelines of a national system or of a system approved by the Commission of the European Communities (system participant) Yes  No**

If yes has been indicated: information on the system		
1	System scheme, name, address	
2	System ID (where known)	
3	Participant ID	
4	Certificate of conformity / Certificate	Available <input type="checkbox"/>
		Cert. / Control Body
		Validity From to

**If no has been indicated:**

**The applicant is subject to monitoring by the German main customs offices (Hauptzollamt -HZA) within the meaning of § 17 para. 3 Biokraft-NachV Yes  No**

If yes has been indicated: information on the German main customs office	
1	Seat of the authority / office
2	HZA code number
3	Enterprise registration number as assigned by the HZA

**Where no has been indicated:**

If the applicant uses a system which is neither a national system nor a system which has been approved by the Commission of the European Communities, and if he is registered with that system and is not subject to monitoring by the German main customs offices either, he cannot be given access to the Nabisy web application.

## **Explanations on the application for accessing the web application Sustainable Biomass System (Nabisy)**

### **General Information**

The free of charge Nabisy web application allows for the issuing of partial proofs of sustainability, provided access to the application has been authorized and the applicant holds a valid proof of sustainability or partial proof of sustainability.

For this web application a user name and password are required. With this application form you may apply for these with the BLE.

In the case of the BioSt-NachV, partial proofs of sustainability are issued for operators of facilities producing electricity from liquid biomass, so that they may claim remuneration from the network operator pursuant to the Renewable Energies Sources Act (Erneuerbare-Energien-Gesetz (EEG)).

Within the scope of application of the Biokraft-NachV a partial proof of sustainability is required for successfully claiming tax relief pursuant to § 50 of the Energy Tax Act (EnergieStG), or for crediting the biofuels towards the biofuels quota.

Nabisy presents you with the possibility of filing different types of applications for partial proofs of sustainability:

- 1 *Application for division:* A proof of sustainability or partial proof of sustainability is divided among several recipients. The remaining quantity will always be credited to the owner of the goods as partial proof of sustainability.
- 2 *Application for combination:* A person holding several proofs of sustainability or partial proofs of sustainability would like to combine these quantities in a single partial proof of sustainability.
- 3 *Application for transcription:* The total quantity of a proof of sustainability or partial proof of sustainability is sold unchanged. In order for the buyer himself to be able to have direct access to the proof of sustainability sold to him, a transcription is required.

Nabisy ensures that only the quantity stated in the proof of sustainability or partial proof of sustainability can be divided, combined or transcribed.

### **Entitlement to file an application**

Operators are entitled to apply for a password for the Nabisy web application, provided the following applies:

- 1 The operator complies with the sustainability provisions laid down in a national system or in a system approved by the Commission of the European Communities and is registered with this system.
- 2 An operator is also entitled to apply, if he is subject to monitoring with the German main customs offices within the meaning of § 17 para. 3 *Biokraft-NachV* and is registered with the German customs administration.

## **Core data**

- (1) It is necessary to state whether the applicant is a company or an operating unit (*companies* are legally independent economic units which produce, process, trade or supply biomass. *Operating units* are legally dependent economic units of a company (dependent establishments).  
The application must be filed individually for each operating unit;
- (2) the name, together with the legal form and address of the company or operating unit must be stated; the e-mail address and telephone number of the company or operating unit must also be given, and
- (3) the person who is responsible for biomass in this company and/or operating unit must be clearly indicated.

## **Information on the system**

Where the body filing the application meets the requirements of a national system, or of a system which is approved by the Commission of the European Community (§17 para. 2 Biokraft-NachV and/or BioSt-NachV),

- (1) this must be stated here together with its address,
- (2) where known, the identification number of the system must be given, and
- (3) the identification number of the applicant (as assigned by the system).
- (4) information about the certificate / about the conformity certificate have to be given.

## **Information on the German main customs office**

Where the applicant is active in the field of fuels and is subject to regular monitoring by the German main customs offices within the meaning of § 17 para. 3 Biokraft-NachV,

- (1) the seat of the German main customs office under whose competence he falls must be stated. If there are several main customs offices in the same city (e.g. in Hamburg), the main customs office must be designated more precisely,
- (2) the number of the German main customs office must be given, and
- (3) the enterprise number assigned by the German main customs office must be stated.

## **Information on registration**

For accesses for which an individual application is filed, the person's name, first name, business telephone number, e-mail address and position within the company and/or operating unit must be stated. In case of more than five people requiring an access to Nabisy, several copies of page 2 must be submitted.
