

REDcert² ensures transparency in certification

REDcert²

We list all valid participant certificates for our certification schemes in a scheme-specific and publicly accessible database. Sustainability properties are clearly compiled here at a glance. In the REDcert² scheme, companies also have the option of creating **product certificates** with certified advertising claims.

REDcert² - Advantages of product certificates

- **Customer communication:** transparent, reliable and efficient
- **Flexibility:** Additions to the products possible at any time!
- **Marketing potential:** Decide for yourself which products you communicate aggressively to the outside world with a product certificate!

Do you have questions about the REDcert² certification scheme?

We will be happy to help!
